

## INTIMATIONS

*(Continued from page 60)*

## EXTRACT.

## A LITERARY CURIOSITY.

Why all this talk for triumphs of an hour?—*Young.*  
 Why a short career, man a flower—*Young.*  
 By turns we catch the wind, and then we fly—*Young.*  
 The earth and the wind, and the rain, and the sun—*Young.*  
 It is better for thee not to be—*Young.*  
 Though all man's life may seem a tragedy—*Young.*  
 But light and dark when night is dim—*Young.*

The bottom is but shallow when they come—*Young.*  
 Your fate is but the common fate of all—*Young.*  
 Unhappy joys have no man's fall—*Young.*  
 Nature to each allots his proper share—*Young.*  
 Fortune makes folly her peculiar care—*Young.*  
 Custom does often reason overrule—*Young.*  
 And show a cruel sunshine on a fool—*Young.*  
 Live well; how long or short, permit to fate—*Young.*

They who forgive must be most forgiving—*Young.*  
 Sin may be chased, but it cannot be forgiven—*Young.*  
 The way to the heart is through the eye—*Young.*  
 Vile intercourse where virtue is sold—*Young.*  
 Then keep each passion down, however good—*Young.*  
 Then punish him who smiles and then—*Young.*  
 Her sensual scars let foolish pleasures lay—*Young.*

With craft and skill, to ruin and betray—*Young.*  
 Soar not too high to fall, but stoop to rise—*Young.*  
 We make our grave of all that we do—*Young.*  
 O, then, I beseech thee, be a fool—*Young.*  
 Riches have wings, and goodness is a dove—*Young.*  
 Think not ambition will become thy love—*Young.*

The path of glory lead but to the grave—*Young.*  
 What is ambition? 'Tis a glorious thing—*Young.*  
 Only destructive to the brave and great—*Young.*  
 What's all the glory but a crown of thorns—*Young.*  
 The way to the heart is through the eye—*Young.*  
 How long will you not wake, but sleep—*Young.*  
 The man lives twice who lives the first life well—*Young.*

Make, then, what you may, your god your friend—*Young.*  
 When Christians worship, yet not comprehend—*Young.*  
 The true that is given cannot, and to yourself be true—*Young.*  
 For, live we now as men, yet die we must—*Young.*

A FRENCH PHYSICIAN'S DISCOVERY.  
 A French physician who seeks to forestall that civilization is a fight against nature, contends that groaning and crying are two grand operations by which nature always acquiesces; that those patients who give way to their natural feelings more speedily recover from accidents and operations than those who suppress the voice of nature, and betray such symptoms of contrivance as either to grieve or cry. He tells of a man who reduced his pulse from 126 to 60 in the course of a few hours by giving full vent to his emotion. If people are at all unhappy about anything let them go into their rooms, and comfort themselves with a loud howl, and they will feel 100 per cent. better afterwards. In accordance with this the crying of children should not be too greatly discouraged. What is natural is nearly always useful, and nothing can be more natural than the crying of children when anything occurs to give them either physical or mental pain.

A DISINTERESTED SARINE CITY.  
 A letter from Aquila, in the Abruzzi, tells us that an Italian Archaeological Royal Commission have just visited Sallust's birthplace, the site of the old Sabine town of Amerinum, and has recommended the Government to resume and complete the excavations commenced some years ago. At that time a portion of the theatre and its surroundings were brought to light. It was a semi-circular structure with stone seats. Several inscriptions and much ornamental works with carved pillars, walls, and a stone staircase were naturally found. By a singular freak of chance this theatre and the entire part of the old town were covered up by debris and accumulation of soil, while the amphitheatre, which is only a few hundred paces distant from the theatre, remained exposed to confront the effects of time. Its structure remains shattered and weather-beaten, but still imposing. Its elliptical arena is now a corn field, where the harvest is regularly sown and gathered. All around stand the high mountains of the Abruzzi. Not far from Amerinum there is a deep valley a cyclopean wall, on which a slab was found with the inscription "Faisies Sabini-norum," the boundary of the Sabines.

PATTI'S BAD BROTH.  
 A certain wine-shop in Third Avenue, near Fourteenth street, is frequented almost exclusively by Italian singers and musicians. It dropped in there the other evening for a glass of chianti, and while sipping it saw a shabby-dressed man enter. After a glance round the place he dropped into a chair with the familiar air of one accustomed to this resort. "That chap," said I to my companion, "looks like 'Don Bixio' in 'The Barber of Seville.' He ought to," was the reply, "for that's the part he was using. Don't you know him? He is Adella Patti's brother."

"Patti's brother! Does she recognize him when he comes to New York?" "Certainly," she does, though I am told that sometimes, when he goes to the "Windsor" to call on her, the servant-tells him she is out when she is in. What does he do now? Well he can't be said to sing, except when he is asked to drink. Thus he sings out quickly enough. I think it is just possible that his theatrical sister gives a small allowance to him, for he manages to live without harder work than that in which you see him engaged at this minute—holding down a name-bottomed chair. I've seen a great deal of him in print about Patti's estate in Wales, but never anything of the shabby of her American brother. To tell the truth, I don't know what he is—probably in some obscure street in the East Side. He used to be a fairly good singer, but in no way fit to be estimated along with his sisters Adella and Carolina."

—N. Y. Letter in Albany Evening Journal.

THE MOST MARRYING PEOPLE IN EUROPE.  
 The English are a people much given to matrimony. Not only their average annual marriage rate higher than those of all other European countries, with the exception of the German and the Austro-Hungarian Empires, but, says the Registrar-General, they also marry at an earlier age than is the case in any other European country excepting Russia. In Russia a very large proportion of the marriages are between boys and girls under 20 years of age; and it is stated that no less than 60 to 70 per cent of the conscripts, who cannot be over 21 years of age, are already married when they come to be enrolled in the army. The explanation given of this strange anomaly by M. Petro Semenov, is that in Russia the population consists of an enormous proportion of small agriculturists, who are in the habit of marrying their sons at as early an age as possible (the legal age being eighteen for males) in order to secure an additional female labourer. Putting aside this exceptional case of Russia, in which the statistics are given in the proportion of either male or female who were under 25 at the time of marriage so high as in England. Very young brides, brides that is to say under 20 years of age, are proportionately more common in France; but with this exception, and of course that of Russia, the figures for England are each of the first two columns, both for males and females, are higher than that for any other country.

## TO BE LET.

THE OFFICES No. 54, Queen's Road Central, at present in the occupation of the HONGKONG, CANTON, AND MALACCA STRAITS TRADING CO., LIMITED.  
 Apply to  
 G. C. ANDERSON,
